

SARS-CoV-2 Sequencing Simplified using Nanopore Sequencer & ARTIC Pipeline

We Provide complete solution to set up NGS lab for SARS-CoV-2 sequencing & analysis. Buy the hand-held, low-cost nanopore sequencer along with reagents for amplification, library preparation & sequencing.

Training to set up the sequencer will be provided

MinION sequencer with system control & software

Solution from GT for SARS-CoV-2 sequencing

Reagents for SARS-CoV-2 amplification

Reverse transcriptase & Taq Polymerase

COVID Primer POOL A

COVID Primer POOL B

Reagents for Library preparation & sequencing

Write to us for support on applying rapid COVID testing by sequencing.
